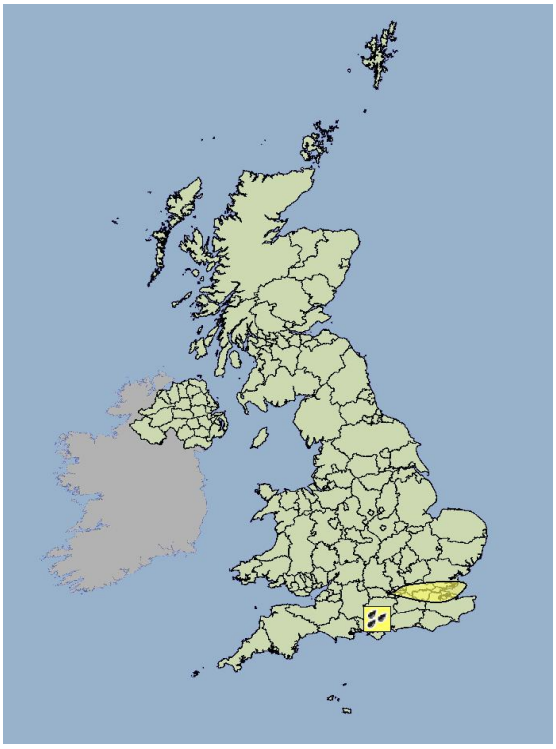
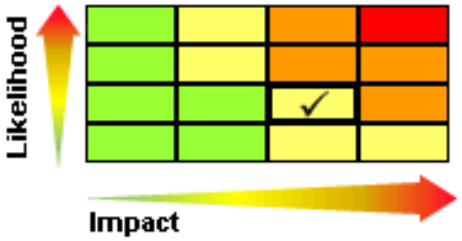
National Severe Weather Warning Service





Chief Forecasters Assessment
Another day of heavy, thundery showers is expected before drier conditions return for the weekend. the showers will become more widespread this afternoon as temperatures rise before slowly easing again by late evening. 20-30 mm of rain could fall in an hour in places, and as much as 40-50 mm very locally, bringing the risk of flooding from surface water or small rivers, especially across urban areas.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **10:30 on Fri, 17th Jun 2016** until **22:00 on Fri, 17th Jun 2016**

Heavy showers and thunderstorms will again affect southern parts of the UK today. These will become organised into slow-moving bands in places, leading to some torrential downpours, particularly later this afternoon and this evening. As on preceding days some locations will miss these downpours, but please be aware of possible localised flooding and disruption to travel where they do occur. The potential for greatest and most widespread disruption is across London and surrounding heavily urbanised areas. Lightning could be an additional hazard.
